Instructions

Read all the information. The part highlighted in blue is the part you have to answer.

1. Obtaining and Assessing Evidence

A) Imagine you are a vet. An owner brings their pet cat to you and says that it is not eating and is losing weight. List three questions you would ask the owner in order to help you investigate the problem.

.....

.....

.....

.....

.....

B) Now explain how you would use the owner's answers to your questions as evidence, to help you come to a scientific conclusion about the cat's illness.

.....

.....

.....

.....

.....

C) Describe what process you would need to go through if you were a vet and you needed to give a dog the correct dosage of a drug.

.....

.....

.....

.....

.....

2. Scientific Careers

A) List three ways in which vets and veterinary nurses use scientific enquiries in their day-to-day jobs.

.....

.....

.....

.....

.....

B) Imagine you are a vet or veterinary nurse. Explain what you would enjoy most about your job. Explain what you would enjoy least about your job.

.....

.....

.....

.....

.....

C) Imagine that you would like to become a vet or a veterinary nurse. Explain what you might need to do in order to achieve your goal.

.....

.....

.....
